Quality Assurance Review National Bridge Inspection Standards & Bridge Maintenance Program

Henry County

October 5, 2022

By: Mark Sherman, PE CEAO Federal Bridge QA/QC Engineer

The scope of this review is to evaluate the agency's bridge inspection program based upon The Ohio Revised Code, the ODOT Manual of Bridge Inspection (MBI), and the National Bridge Inspection Standards (NBIS). This includes the following checklist, interviews with staff members responsible for the inspection program, review of files and documentation, and field inspection of bridges. Note: the inspection program includes inventory, maintenance and load rating in addition to the field inspections.

Agency: Henry County Engineer's Office

DATE: 10/4/2022

Questionnaire Completed by: Derek Heitzman

I. MAINTENANCE, REHABILITATION AND REPLACEMENT PROGRAM

A. NUMBER OF BRIDGES WITH MAINTENANCE RESPONSIBILITY

- 1. Greater than 20' long (NBIS length 23CFR 650c) (Metric 22) 165
- 2. Bridges >= 10' and <= 20' long (Metric 22) 133

B. PROCEDURES AND BUDGET

1. Contract repairs and replacement per year

Replacements: (Enter Number): Culverts : Bridges: 1

Rehabilitations (Enter Number): Culverts : Bridges:

Replacements (Enter Number): Culverts : Bridges:

-List approximate annual budget: 500,000

Are Credit Bridge funds used?

2. In-house repairs and replacements

| Replacements:(Enter Number): | Culverts: 2 | Bridges: | 1 |
|---------------------------------|-------------|----------|---|
| Rehabilitations (Enter Number): | Culverts : | Bridges: | |
| Replacements (Enter Number): | Culverts : | Bridges: | |
| List approximate annual budget: | \$400,000 | | |

- **3**. How are projects identified and selected? Check all that apply.
 - Inspection reports.
 - □ Sufficiency rating.
 - Growth/development.
 - Other...explain Click or tap here to enter text.
- 4. How are plans developed for emergency repairs? Check all that apply.
 - In-house
 - Consultant
 - Contractor
 - Other explain Click or tap here to enter text.
- 5. Who does the work of emergency repairs? Check all that apply.
 - In house
 - Contractor
 - Other explain Click or tap here to enter text.
- 6. How is repair work documented? (i.e. work record, time card, plans?)
 - Work orders
 - Time Cards
 - Plans
- 7. Who is empowered to order emergency road closures and how is it done?
 - Engineer?
 - □ Sherriff?
 - Commissioners?

II. INSPECTION PROGRAM

A. NUMBER OF BRIDGES WITH INSPECTION RESPONSIBILITY

1. Greater than 20' long (NBIS length, ORC 5501.47, 5543.20) (Metric 22) 164

2. Between 10' and 20' long (ORC 5501.47, 5543.20) (Metric 22) 130

B. STAFFING

1. Name of individual who is the **Program Manager** (makes FINAL DECISION). List qualifications/yrs. experience (bridge inspection experience) (Metric 1&2)

Name: Timothy J. Schumm, PE 62821

- Yrs. Inspection related experience: _11____

- List courses attended (& approx. dates) Dates and Courses in Assetwise

2. Name of individual in charge of bridge inspection unit (**Reviewer**). List qualifications/yrs. experience (bridge inspection experience) (Metric 1)

Name: Timothy J. Schumm, PE 62821

- Yrs. Inspection related experience: ____11____

- List courses attended (& approx. dates) Click or tap here to enter text.

3. **Team Leader** - individual in charge of bridge inspection team (INSPECTED BY). List qualifications/yrs. experience (bridge inspection experience) (Metric 1&3)

Name: Derek A. Heitzman, PE 73402

- Yrs. Inspection related experience: _19____

- List courses attended (& approx. dates) Dates and Courses in Assetwise

C. Indicate the percentage of time spent on the listed duties in the previous year

%TIME on inspections:

- 25_% Bridge/Culvert inspection
- 25_% Bridge Design/Plan prep
- <u>__%</u> Bridge Construction
- <u>___%</u> Bridge Maintenance
- ___% Overload/Superloads
- 25_% Surveying
- 25_% Other -
- ___% 100% on Bridges only

4. **Load Rating Engineer** – Name of individual responsible for load ratings (must be PE) (Metric 4)

a. List Ohio PE # 62821_ b. Name: Timothy J. Schumm

5. Underwater Bridge Inspection Diver - Name person doing dive inspections (Metric 5)

Name: Click or tap here to enter text.
Yrs. Inspection related experience: Click or tap here to enter text.

- List courses attended (& approx dates) Click or tap here to enter text.

D. INSPECTION EQUIPMENT

1. Type of vehicle used for inspections

- Pickup truck
- ⊠ Van
- SUV
- Custom vehicle

2. What typical inspection equipment does the inspection team normally carry with them to the inspection site? Check all that apply.

| X | Extension Ladder Length 20 | \mathbf{X} | 6' Folding Rule |
|--------------|---|--------------|------------------------|
| X | 100' Fiberglass Tape | X | Scraper |
| X | Geologist Hammer | \mathbf{X} | Vertical Clearance Rod |
| X | Inspection Mirror | \mathbf{X} | Probing Rod |
| X | Flashlight | \mathbf{X} | Paint Stick/Crayon |
| | Thermometer | \mathbf{X} | Hip Boots and Waders |
| X | Plumb Bob | | Sounding Chains |
| X | Camera | | Wrenches |
| X | 2'-0" Level | | Pliers |
| X | Brush Hook/Axe | \mathbf{X} | Screw Driver |
| X | Boat | \mathbf{X} | Shovel |
| X | First Aid Kit | \mathbf{X} | Calipers |
| \mathbf{X} | Wire Brush | | |
| Oth | er equipment not listed above: Click or tap | here to | enter text. |
| 3. L | ist types of NDT methods used? Circl | e all th | at apply. |

□ Dye penetrant; □ Magnetic particle; □ Ultrasound;

| Other | Click | or | tap | here | to | enter | text. |
|-------|-------|----|-----|------|----|-------|-------|
|-------|-------|----|-----|------|----|-------|-------|

5. What equipment does your team have available for "hands on" access to \underline{FCM} bridge members? (Metric 16)

Ladders

6. Use of equipment (Metric 16)

- a. How many bridges need a snooper? 2
- b. How many bridges is it used on? 2
- c. How often? Annually

7. Who determines the need for a routine inspection frequency greater than once Annually, and what criteria is used? (Metric 6)

Explain: County Engineer and Bridge Inspector based on critical findings

8. Do you have bridges requiring insp. more frequently than 12 MO Yes No X
Number due to Damage Choose an item. List frequency of inspection. (Metric 11)
Number needing In-depth Choose an item. List frequency of inspection. (Metric 11)

____ Number of **Special insp** Choose an item. List frequency of inspection. (Metric 11)

9. Does your inspection team believe it has enough time to do the job? Yes ⊠ No □

10. List your quality assurance checks made during the inspection process? (Metric 20)

QAR by CEAO every 5 years and QAR in house on years in between.

11. Do you have any bridges that need underwater inspections in less than 60-month intervals? (Metric 8)

Yes No X (Assetwise check)

12. Do any bridges have fracture critical inspections performed more frequently than 24-month intervals? $_{(Metric 10)}$

Yes No X (Assetwise check)

13. Is a Team Leader at the bridge at all times during the following inspections? (Metric 12)

| Initial Inspection? | Yes 🛛 | No 🗆 |
|--------------------------------|-------|------|
| Routine Annual Inspections? | Yes 🛛 | No 🗆 |
| Special Inspections? | Yes 🛛 | No 🗆 |
| Underwater Inspections? | Yes 🛛 | No 🗆 |
| Fracture Critical Inspections? | Yes 🛛 | No 🗆 |

E. INSPECTION PROCEDURES

1. Approximately how many inspections were made during last calendar year? (Metric 6) 294

2. Approximately how many inspections are scheduled for the current calendar year? (Metric 6) 294

3. Average number of inspections per day (Metric 6) 8

4. Approximately how long (hours) does it take to inspect average sized structures

a. Beam/Girder: Simple Span: .75 hrs. Multi-span: 1.25 hrs. b. Slab bridge: Simple Span: __.75___hrs. Multi-span: <u>1.25</u> hrs. c. Truss (pony): Simple Span: 2_hrs. Multi-span: ___hrs. d. Through/deck): Simple Span: hrs. Multi-span: hrs. e. Culvert: Single cell _____.5___hrs. Multiple Cells: ___.75__hrs. 5. Are previous inspection reports available at site for review? (Metric 15) Yes X No 6. Are bridge inspections recorded in field on Paper Electronically 7. Are photos available for every bridge? Yes 🛛 No 🗌 (If no, you need to start.) 8. Are photos posted in Assetwise? Yes 🛛 No 🗌 (If no, you need to start, and be selective.) 9. Are defects photos taken during inspection? Yes No [] (If no, you need to start.) 10. Are Bridge comments recorded in Assetwise? Yes No [] (If no, you need to start.) 11. Are previous bridge comments brought to the bridge? Yes X No (If no, why not) 12. Are the bridge plans carried to the bridge site for review? (Metric 15). Yes 🗌 No 🔀 13. Are bridge records available for review in the bridge office? (Metric 15) Yes 🛛 No 🗌

F. SCOUR CRITICAL BRIDGES (Guidance in ODOT Manual of Bridge Inspection)

1. No. of bridges considered scour susceptible? (Service over Water) Number 294

2. Number of bridges inspected by probing? Number 293__.

3. Number of Scour Critical bridges (item 113 - 3, 2, 1 or 0)? (Metric 18) Number _3_.

4. Are Plans of Action (POA) complete and implemented for all bridges coded "Scour

Critical"? (Metric 18) Yes 🛛 No 🗆 If no, Why? Click or tap here to enter text.

- 5. How many structures are coded 6 on item 113 Scour Critical? (Metric 18) Number ___0_.
- 6. How are scour evaluations performed? (Metric 18)

Visual or Probing

7. Who determines the need for diving inspections and by what criteria?

Program Manager per bridge inspection manual and ODOT correspondence

G. INVENTORY

1. What kinds of inventory quality assurance checks are performed? (Metric 22)

Who checks? Program Manager

How Often?... ☑ With every inspection □ Less often than once per year

2. How often is the inventory checked for needed updates? (Metric 22)

How Often?... 🛛 With every inspection 🛛 🗖 Less often than once per year

3. How is the inventory data input into Assetwise?

- Electronically, Direct into Assetwise from collector App. as bridge is inspected
- All at once at the end of the year from a paper copy into Assetwise
- As each inspection is complete from paper to computer to Assetwise.

4. When is the updated/new inventory data forwarded to ODOT? (Metric 23)

Changes discovered during inspection? Yes ⊠ No □ Changes from new construction or rehab? Yes ⊠ No □

5. NBIS requires that the inspecting organization maintain master lists of the following:

(Metric 16,17,11)

a. Bridges that contain fracture critical members, including the location and description of such members on the bridge and the inspection procedures of such members (Each individual FCM member on each FCM bridge must be clearly identified in the bridge file) (Where a FCM Identification Plan exists then look for remaining fatigue life). Master List?

Yes ⊠ Number__4_: If, No, Why not? _____ NA □

b. Bridges requiring underwater inspections.

Number__1__ NA

c. Bridges with unique or special features (i.e., pin & hanger, draw, suspension) Number__0__ NA ⊠

Note: An examination of the files will be performed during the review.

Options: For the files listed below you can email a copy of a typical file or have them on hand for inspection.

- Bridge Files
- Scour Critical POA.
- Fracture Critical Plan.
- UW inspection Procedure

H. PROCEDURES

1. Are new maintenance problems identified during bridge inspection? (Metric 15)

Yes 🛛 No 🗆

2. How do the inspectors inform maintenance personnel of routine bridge maintenance problems (written, oral, other)? (Metric 15)

- Written work order.
- Electronic Communication.
- Oral direction.
- □ Other. Explain

Click or tap here to enter text.

3. Who do the inspectors notify when emergency repairs, or critical findings are necessary (action required within 1 week)? (Metric 21)

Check all that apply.

| County Engineer | Bridge Superintendent |
|------------------------|-----------------------|
| County bridge Engineer | □ Sheriff |

How is this emergency action documented? (Must be entered and tracked in Assetwise)

Explain if different than procedure in Assetwise Click or tap here to enter text.

4. If a bridge requires emergency repairs, is this noted as part of the inspection report or as a separate document? (Metric 21)

A separate document, then put into Assetwise in the inspection comments.

5. Who checks proper placement of signs (load posting, clearance, speed restriction, narrow bridge etc.)? (Metric 15)

Team Leader

I. LOAD ANALYSIS AND POSTING

- 1. Number of plans for existing bridges available for NBIS length bridges. 125_
- 2. Number of plans for non-NBIS bridges (>= 10' and <= 20' long) _135_
- 3. Number of bridges analyzed using the AASHTO Bridge Evaluation (Metric 13)_264___ By Whom (Metric 13)
 - Load Rating Engineer
 - County Engineer
 - Bridge Engineer
 - ⊠ Consultant

4. When are bridges load rated, after initial rating. Check all that apply

- Every 5 years regardless.
- When there is a significant change in condition rating.
- When wearing surface thickness increases more than 1-1/2 inches
- When permit load is requested
- other

5. Methods used (Metric 13)

- AAWSHTO BrR
- Hand Calculated
- Engineering Judgement (BR100)
- BARS or other proprietary software program
- □ Other Explain_

6. Number of NBIS length bridges "not ratable" at all due to lack of data and may have to be field tested. (Metric 13) (These are bridges that have a coding of 5, not 0 in the method of analysis Item.)

Number ____0_ Plan of action for load rating these? Click or tap here to enter text.

7. Number of NBIS length bridges load posted (Metric 14) (Assetwise Check)

Number of bridges posted 18___. Number of bridges with posted Signs in the field_18___.

8. List bridges closed due to condition rating (rough check)

H1-2.90, 16B-0.45, 8C-0.20, Q2-0.15

9. List bridges rated less than 100% Ohio legal load and not physically load posted, and resolution. (Assetwise Check)

10. Number of NBIS bridges with Gusset Plates (Metric 13) __4__

11. Number of NBIS bridges with Gusset Plates analyzed. (Metric 13) _4___

12. Describe filing system (where files are kept): (Metric 15)

- Inspection reports, including old inspections:
- On paper file in Office
- Electronically
- In Assetwise
- □ All three
- Other

- Design Calculations:
- On paper file in Office
- ☑ Electronically
- In Assetwise
- □ All three
- Other

• Plans:

- On paper file in Office
- ☑ Electronically
- In Assetwise
- All three
- Other

• Load analysis calculations:

- On paper file in Office
- ☑ Electronically
- In Assetwise
- □ All three
- Other
 - Inventory forms:
- On paper file in Office
- Electronically
- In Assetwise
- □ All three
- Other
 - Photos and sketches:
- On paper file in Office
- ☑ Electronically
- In Assetwise
- □ All three
- Other
 - Repairs and maintenance history
- On paper file in Office
- Electronically
- In Assetwise

- □ All three
- Other
 - Scour evaluation:
- On paper file in Office
- ☑ Electronically
- In Assetwise
- □ All three
- Other

• Scour POA:

- On paper file in Office
- □ Electronically
- In Assetwise
- □ All three
- Other
 - Fracture Critical File:
- On paper file in Office
- Electronically
- In Assetwise
- □ All three
- Other
 - Load Posting/Closing:
- On paper file in Office
- **Electronically**
- In Assetwise
- All three
- Other
 - Underwater inspections:
- On paper file in Office
- Electronically
- In Assetwise
- □ All three
- Other
 - Special inspection eqpt. or procedures:
- On paper file in Office
- Electronically

- In Assetwise
- All three
- Other
 - Flood data, waterway adequacy, channel cross sections:
- On paper file in Office
- **Electronically**
- In Assetwise
- □ All three
- Other

Note the NBIS Retention period: BR-86 report 10 years, All records 3 years after bridge removed, Load rating calculations 3 years after a new rating is done.

| 13. What is the FC bridge inspection frequency? (Metric 16) Every _24_ Months |
|--|
| 14. Is the FC Plan completed for all FC bridges? (Metric 16) Yes ⊠ No □ |
| 15. Are the FCM Identified in the FC Plan? (Metric 16) Yes 🛛 No 🗆 |
| 16. What is the underwater inspection frequency? (Metric 17)Every _60_ Months |
| 17. Are the underwater elements identified and located? (Metric 17) Yes D No D |
| 18. List any complex bridges: (Metric 19) |

19. Do the complex bridges require specialized inspection procedures and additional inspector training? $_{(Metric\,19)}$

Yes 🗆 No 🗆

Describe:

Other equipment not listed above:

Part II: Field Review

Inspection Reports (metric 12)

As part of this review, seven bridges were field reviewed to compare conditions with the most recent inspection report. The individual condition ratings for all of the field sampled bridges properly reflected the field conditions within the tolerance of 1 rating value when compared to the Manual. Summary ratings correspond with the NBIS inspection items. **Field Review:**

HEN-C0424-1800 (3501590) Masonry Culvert

| Item 58 DeckN | Agreed |

| Defect Photos: Good defect photos |
| Channel Photos: Very good channel photos. |

HEN-00011-0785 (3532984)

Steel Truss

Item 58 Deck..... 7 Agreed

Item 59 Superstructure...... 5 Agreed Floor beams have plates welded to the bottom of the bottom flange creating a category E' weld detail and fracture critical. It needs to be closely inspected and included in the FC inspection process.

Item 60 Substructure......7 Agreed Item 61 Channel..... 6 Agreed Item 61.01 Scour.....7 Agreed Item 62 Culvert.....N Item 67.01 GA5 Agreed Item 36 Railing...... 0 0 0 0 N N N no railing, see previous comment Item 72 Approach Alignment 6 Agreed Comments: Great comments in Assetwise. Defect Photos: Good defect photos...again, need some labeling and contextual shots too. Channel Photos: Good channel photos

HEN-00011-0835 (3535568) Prestressed box beams

Item 58 Deck..... 5 Agreed

Item 59 Superstructure...... 5 Agreed This is rated a 5 based on the Prestressed table due to joint leakage. It is my opinion that leaking water with no sign of spalling or efflorescence does not warrant a 5 rating and should be a 6 or better. (But the 5 is acceptable)

Field Review Summary:

Overall, the county is doing an excellent job with their bridge inspection program. Their records are complete and organized. I found all of their condition ratings to be within the parameters set by the inspection manual. The comments could use a little more elaboration at times, with corresponding photos to show the Location, Extent and Severity of the defects. Otherwise, the comments and photos are good.

The bridges above have a scour rating that requires corrective measures. Once the measures are implemented the scour rating should move to a 7.

All data is complete and correct in this section.

Given the changes coming in 2023 and the now required shear analysis, please make sure your load rating documentations are complete and include a BR100 with complete statements of assumptions, measurements and methodologies for anything using engineering judgement.

HEN-00011-0775 (3532977) HEN-00011-0775 (3532977)

Lowest load Factor for both bridges is the EV3 Column T should reflect that %

You have 13 bridges that are less than 95% legal but no posting sign date entered in Assetwise. See Column AM in Load rating TAB

All other bridge data is complete and correct in this section.
